PRODUCT REQUIREMENT DOCUMENT

PRD — Trading Education Landing Page (HighProbTrade)

PRD-2026 · AIAvenue Agency

Executive Summary

HighProbTrade, an AI-powered trading education brand, needs a single-page landing page to gauge market interest for its upcoming AI trading course product. The landing page must function as a lead capture engine — driving traffic from paid ads (Facebook, Instagram, YouTube), organic search, and referral traffic to a scannable, high-conversion single-page experience. Built with React 19 + Vite 6 + Tailwind CSS 4, the page features a hero section with gradient text, an interactive feature carousel, a live AI demo card that analyses RELIANCE stock in real-time (via API simulation), two-tier pricing (₹4,999 / ₹9,999), and Firebase Auth with email OTP verification via passwordless sign-in links. Leads are stored in Firestore for CRM follow-up. The core business objective is to collect 5,000 verified leads in the first 90 days. This is a lightweight validation project — total build time estimated at 3 weeks with a 2-person frontend team. Target TAM is ₹600 Cr, SAM ₹150 Cr, SOM ₹45 Cr in the Indian trading education market.

Problem Statement

Core Problem

The Indian trading education market is booming (post-COVID, millions of new retail traders entered F&O), but it suffers from a severe trust deficit. An estimated 60% of "trading courses" are scams or repackaged YouTube content. HighProbTrade has developed a proprietary AI-driven trading methodology but lacks a dedicated digital storefront to:

1. **Validate market demand** before investing in full-course production 2. **Collect verified leads** (email + phone) with consent for follow-up 3. **Demonstrate credibility** via a live AI demo that proves the technology works 4. **Gauge price sensitivity** between two pricing tiers (₹4,999 vs. ₹9,999)

User Pain Points

Persona	Pain Point	Frequency	Severity
Aspiring Trader	Wants to learn professional trading but doesn't know whom to trust	Per decision	Critical
Experienced Retail Trader	Makes ₹15–20K/month but knows AI could 2× that; needs proof before paying	Before purchase	High
Failed Course Buyer	Has been burned by 2 paid courses before; will only buy if there's a demo	Per consideration	High
HighProbTrade Founder	Cannot validate pricing or demand without a proper funnel	Business-level	Critical

Core Problem

The Indian trading education market is booming (post-COVID, millions of new retail traders entered F&O), but it suffers from a severe trust deficit. An estimated 60% of "trading courses" are scams or repackaged YouTube content. HighProbTrade has developed a proprietary AI-driven trading methodology but lacks a dedicated digital storefront to:

1. **Validate market demand** before investing in full-course production 2. **Collect verified leads** (email + phone) with consent for follow-up 3. **Demonstrate credibility** via a live AI demo that proves the technology works 4. **Gauge price sensitivity** between two pricing tiers (₹4,999 vs. ₹9,999)

User Pain Points

What This Page Solves

- **Trust gap**: Live AI demo proves the tech works on real-time data (RELIANCE example)
- **Validation gap**: Two-tier pricing + conversion tracking reveals optimal price point
- **Lead capture gap**: Firebase Auth with email OTP ensures verified, high-quality leads
- **Content gap**: Feature carousel communicates curriculum depth without overwhelming

---

User Research & Personas

Persona 1: Arjun Nair — Aspiring F&O Trader

Attribute	Detail
Age	26
Location	Thane, Mumbai
Day Job	Business Analyst at an IT firm
Trading Experience	8 months; self-taught via YouTube; has lost ₹45K so far
Motivation	"I know trading can work — I've seen people do it. I just need a structured system so I stop losing money on random tips."
Digital Behaviour	Active on Instagram Reels (trading content), YouTube (searching strategies), Telegram (free tips groups)
Pain Point	Overwhelmed by conflicting advice; no way to distinguish signal from noise
What He Needs	A credible course with a clear curriculum, a free preview (demo), transparent pricing, and proof of results

Persona 1: Arjun Nair — Aspiring F&O Trader

Persona 2: Deepa Srinivasan — Experienced Part-Time Trader

Persona 3: Ravi Khanna — Skeptical Course Buyer

Market Analysis

Total Addressable Market (TAM)

Indian trading and investment education market (2026):

- 2.5 million active F&O traders
- Estimated 8 million equity investors (mutual funds + direct equity)
- 40% express interest in structured education/training
- Average willingness to pay: ₹5,000–₹15,000 per course

TAM = 10.5M × 40% × ₹7,500 (avg) = ₹3,150 Cr

Our segment — AI/quantitative trading education — is the premium sub-segment (25% of the above, capping at ₹10K/course).

TAM = ₹600 Cr (AI trading education)

Serviceable Addressable Market (SAM)

Focus on English-speaking, digitally-active traders in Tier-1 and Tier-2 cities who:

- Own a Demat account
- Have traded at least 50 F&O lots in the last 6 months
- Follow at least 2 financial social media accounts

Estimated **25%** of the above TAM.

SAM = ₹600 Cr × 25% = ₹150 Cr

Serviceable Obtainable Market (SOM)

Target conversion funnel:

- Ad impressions: 5,00,000 (₹5 Lakh ad spend over 90 days)
- Landing page visits: 50,000 (10% CTR)
- Lead captures (email OTP verified): 5,000 (10% conversion)
- Paid conversions: 350 (7% of leads)
- Average order value: ~₹6,500 (blended across 2 tiers)

Year 1 Revenue = 350 × ₹6,500 = ₹22.75 Lakh → scaled to ₹45 Lakh by Year 3 → SOM = ₹45 Cr (long-term)

SOM = ₹45 Cr (5-year aspirational)

Market Rationale

- India added 3.2 million new Demat accounts in FY2025–26; the "newbie trader" segment is massive and growing
- SEBI's tightening of F&O norms (2025) has pushed traders toward education (they realise they need skill, not luck)
- No established AI-specific trading education brand has claimed the market yet
- The ₹5K–₹10K price point is well below the "regret threshold" for most working professionals (impulse-buyable)

Competitive Analysis

Competitor	Type	Strengths	Weaknesses	Our Edge
Varsity (Zerodha)	Free education	Massive brand trust; excellent content; zero cost	No AI focus; no certification; no community; basic-level only	AI-focused advanced curriculum; paid = higher perceived value; live demo
TradingView Academy	Free tutorials	Best charting platform tie-in; global community	Disconnected from Indian F&O market; no structure; no personalised AI	India-F&O-specific; structured curriculum; AI demo with Indian stocks
Booming Bulls Academy	Paid courses	Strong YouTube presence; Indian market focus	No AI methodology; no live demo; mixed reviews on quality	AI-powered methodology; live interactive demo; satisfaction guarantee
The Options Institute (Cboe)	Institutional	Global gold standard for options education	US-focused; ₹50K+ pricing; no Indian context; no AI	Indian F&O focus; affordable pricing; AI-augmented curriculum
Udemy (Trading Category)	Marketplace	Massive catalogue; frequent discounts; reviews	Inconsistent quality; no AI-specific Indian F&O course; no live demo	Specialised AI + Indian F&O; live demo; curated community
Individual Telegram/NSE Gurus	Unorganised	Low cost (₹999–₹3K); direct access to "guru"	Zero accountability; no refund; no curriculum; mostly scams	Structured curriculum; clear T&C; money-back guarantee; Firestore-verified lead system

Key Differentiators:

- **Live AI Demo Card** — "Analyse RELIANCE" → real AI model output (not a video, not a screenshot — actual running inference via API)
- **Firebase email OTP verification** — Every lead is verified (no fake emails, no spam signups)
- **Two-tier pricing with clear comparison** — Let the customer self-segment by commitment level
- **React 19 + Vite 6 + Tailwind CSS 4** — Lightning-fast load times (sub-2s FCP); perfect Lighthouse score target
- **Video-first curriculum** (implied in feature carousel) — Modern learning preference
- **No fake social proof** — Transparent lead count, no stock-photo testimonials (demo-driven credibility)

Page Sections (Detailed)

Section	Content	Key Technical Detail
Hero	Headline: "AI That Reads the Market Like a Quant. Priced Like a Course." Subheadline: 2-liner. 2 CTA buttons (₹4,999 / ₹9,999). Gradient text: `bg-gradient-to-r from-blue-400 via-purple-500 to-pink-500 bg-clip-text text-transparent`	Tailwind CSS 4 gradient utility; Framer Motion entrance animation

Feature Carousel	6 cards: AI Intraday Scanner, Real-Time OI Tracker, Sector Heatmap, VWAP/RSI Dashboard, Backtesting Engine, Community	Embla Carousel (lightweight, 6KB); auto-play with 4s interval; pause on hover; responsive
AI Demo Card	"See AI Analysis for RELIANCE" — click → loading skeleton → displays Trend (Bullish), Support (₹1,210), Resistance (₹1,275), OI Change (+12%), RSI (62), VWAP (₹1,238)	Fetches from `/api/analyse-stock`; loading → fade-in with `AnimatePresence`; mobile-responsive
Pricing	Tier 1: ₹4,999 (Basic — 12 modules, AI tools, 30-day access, certificate). Tier 2: ₹9,999 (Pro — everything + community + 90-day access + 1:1 mentorship + weekly webinars). "Most Popular" badge on Pro.	CSS grid; premium card elevated with shadow + border accent; CTA hooks into Firebase auth flow
Lead Capture	Email input field + "Get Started" → Firebase sends passwordless sign-in email → user clicks link → verified → redirected back → "You're in! Check your email for course details." → Firestore write	Firebase `sendSignInLinkToEmail` + `isSignInWithEmailLink` on redirect
Footer	Minimal: logo, tagline, privacy policy link, T&C, social links	White-label ready

Page Sections (Detailed)

Feature Deep-Dive — RICE Priority Matrix

Feature	Reach (visitors/month)	Impact (1–5)	Confidence (%)	Effort (days)	RICE Score
Tier 1 — Must-Have					
Hero with Gradient Text + CTAs	16,667	5.0	95%	1	79,167
Email Input + Firebase Auth OTP	16,667	5.0	90%	4	18,750
Firestore Lead Storage	16,667	5.0	95%	2	39,583
Pricing Sections (Tier 1 + Tier 2)	16,667	4.5	90%	2	33,750
Mobile Responsive Design	16,667	5.0	95%	3	26,389
Tier 2 — Should-Have					
Feature Carousel (6 slides)	16,667	4.0	80%	3	17,778
AI Demo Card (RELIANCE simulation)	16,667	4.0	70%	4	11,667
Loading Skeleton → Fade-in	16,667	3.0	85%	1	42,500
Framer Motion Animations	16,667	3.5	80%	2	23,333
Toast Notifications (success/error)	16,667	2.5	90%	1	37,500
Tier 3 — Nice-to-Have					
Analytics (GA4 + Conversion Tracking)	0 (dev)	4.0	80%	2	N/A (infra)
UTM Parameter Capture	16,667	2.5	75%	1	31,250

Live Visitor Counter	16,667	2.0	50%	1	16,667
Dark/Light Mode Toggle	16,667	2.0	60%	1	20,000
SEO Meta Tags (OG, Twitter Card)	0 (infra)	3.5	90%	1	N/A (infra)
Social Proof Bar ("X traders joined")	16,667	3.0	60%	1	30,000

Implementation Priority

Week 1 (Days 1–5) — Skeleton + Core Conversion: 1. Hero with gradient CTAs (79,167) 2. Firestore lead storage (39,583) 3. Pricing sections (33,750) 4. Email + Firebase Auth (18,750) 5. Mobile responsive (26,389) 6. Loading skeleton → fade-in (42,500) 7. Toast notifications (37,500)

Week 2 (Days 6–10) — Engagement: 8. Feature carousel (17,778) 9. Framer Motion animations (23,333) 10. AI demo card (11,667) 11. Live visitor counter (16,667) 12. Social proof bar (30,000) 13. UTM parameter capture (31,250)

Week 3 (Days 11–15) — Polish: 14. Dark/light mode toggle (20,000) 15. SEO meta tags + OG images 16. Analytics setup + conversion tracking 17. Load testing + Lighthouse optimisation 18. Domain config + deployment (Vercel)

Success Metrics

KPI	Target (30 days)	Target (90 days)	Measurement Tool
Conversion Metrics			
Landing page visits	16,667	50,000	GA4 + Firebase Analytics
Lead capture rate	8% (1,333 leads)	10% (5,000 leads)	Firestore count
Email OTP verification rate	70% of signups	80% of signups	Firebase Auth
Paid conversion (lead → paying)	5% (67 sales)	7% (350 sales)	Stripe/Payment tracking
Engagement Metrics			
Average session duration	2 min	3.5 min	GA4
AI Demo Card click rate	25%	40%	Custom event
Feature carousel interaction rate	30%	50%	Custom event
Bounce rate	≤ 55%	≤ 40%	GA4
Quality Metrics			
Lead email validity rate	90%	95%	Firebase Auth (verified)
Spam lead rate	≤ 5%	≤ 2%	Manual audit
Page load time (FCP)	≤ 2s	≤ 1.5s	Lighthouse / Web Vitals
Lighthouse Performance score	≥ 85	≥ 95	Lighthouse CI

Roadmap

Phase 1 — Core Landing Page (Days 1–10)

Day	Deliverable
1	Vite 6 + React 19 + Tailwind CSS 4 scaffold; Firebase project setup; Firestore schema design
2–3	Hero section with gradient text + CTA buttons; responsive grid foundation
4–5	Firebase Auth (email passwordless) integration; Firestore lead write on verification
6–7	Pricing tier components (₹4,999 / ₹9,999) with comparison card; "Popular" badge
8	Toast notification system; loading skeletons for dynamic sections
9	Mobile responsive QA; cross-browser testing (Chrome, Firefox, Safari)
10	Deploy to Vercel; domain mapping; Lighthouse audit

Phase 1 — Core Landing Page (Days 1–10)

Go/No-Go: Lead capture flow works end-to-end; Lighthouse ≥ 85; mobile-responsive verified on 3 devices

Phase 2 — Engagement Features (Days 11–18)

Go/No-Go: AI demo card functional; all animations smooth at 60fps; meta tags validate on social share debuggers

Phase 3 — Optimisation & Analytics (Days 19–21)

Go/No-Go: All analytics events firing; conversion funnel visible in GA4; page live on custom domain

---

Impact Estimate

Quantitative Impact (90-Day Campaign)

Metric	Conservative	Expected	Optimistic
Total ad spend	₹4,00,000	₹5,00,000	₹6,00,000
Impressions	3,00,000	5,00,000	8,00,000
Landing page visits	30,000	50,000	80,000
Lead captures	2,400	5,000	8,000
Verified leads	1,680	4,000	6,800
Paid conversions	84	350	680
Revenue (blended ₹6,500 AOV)	₹5,46,000	₹22,75,000	₹44,20,000
ROI (revenue vs. ad spend)	**1.37×**	**4.55×**	**7.37×**

Quantitative Impact (90-Day Campaign)

Post-90-Day Insights (Key Business Decision Data)

Revenue Model (Post-Validation)

If validation passes (≥350 paid conversions at ROI ≥ 3×), the full product roll-out:
